Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/11/09 has been entered.

Response to Arguments

Applicant's arguments filed 2/11/09 have been fully. Applicant has deleted the drawings and corresponding brief description of the drawings, thus, removing the new matter objection into the disclosure.

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards et al (6,866,663).

Edwards teaches a method of soft tissue augmentation to treat at least gastroesophageal acid reflux (1:20 et seq.). The method comprising injecting cylindrical particles (interpreted as pellets) (see 5:8 et seq.). Said cylindrical pellets having a diameter of 0.01 to 0.5 inches (0.01 inches = 254 microns) which is within the claimed outer diameter dimension. It would have been obvious to one having ordinary skill in the art to have tried an inner diameter within the claim range with predictable results. It would have been obvious to one having ordinary skill in the art to have tried the length within the claim range to correctly bulk the desired soft tissue with predictable results.

Regarding claim 5, Edwards teaches at least silicones and polyurethanes. It would have been obvious to one having ordinary skill in the prosthetic arts that polytetrafluoroethylene is a well known substitute for silicones and polyurethanes. Additionally, one of ordinary skill in the art, furthermore, would have expected applicant's invention to perform equally well with any of the claimed material.
